## FIND US

We are Modular Moon - located in A Lab Amsterdam, the Netherlands.

As a sputnik planet for the sound generating industry, we give classes on modular system build up, modular synthesiser prototyping, audio design and live performance.

We guide through these overwhelming topics and design a program that is available to any curious individual, ready to go to the Moon and Back.

## LEARN MODULAR SYNTHESIS

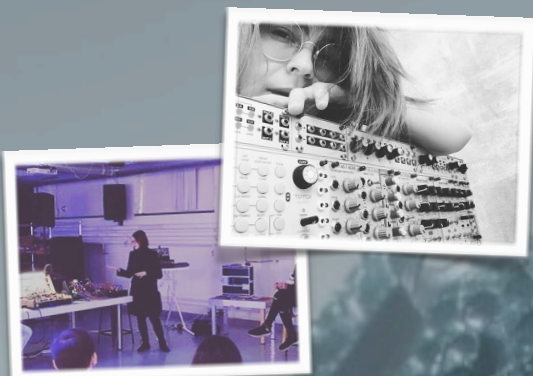

---

Modular Sound Synthesis is considered to be a rare type of musical activity. Fully meditative, it is deep and unique - and now also in Amsterdam.

**modular  
synthesis  
school**

*Our teachers are world known sound synthesis artists, active in the industry as teachers and inventors.*

We designed a program that guides any individual into the modular synthesis realm. With challenging yet simple steps this deep topic is explained so anyone can understand basic principles behind this rare type of audio generating environment. Guided by high level artists, inventors, audio engineers and scientists it is a unique chance to evolve one self. We created Modular Synthesis School with a six month long program, including a personal system to learn with and a DIY kit. We also give individual workshops and group sessions, both inside the Netherlands and abroad. We help with personal system prototyping and build up, introduce best inventors of the scene, encourage live performance and personal evolution.

# WHAT IS MODULAR SYNTHESISER?

The **modular synthesiser** is a type of synthesiser, which exists in both physical and virtual forms, consisting of separate specialised modules. The modules can be connected together with patch cords, unlocking the infinite possibilities of the system.

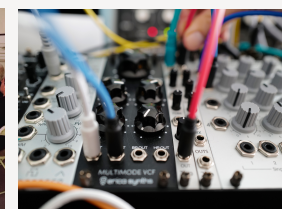

## MODULAR SYNTHESIS CLASSES: € 1881,2 / PER SIX MONTH

Six month long program, includes: \*Modular Synthesis On The Moon Guide Book, \*Personal system for the time of classes, \*Personal DIY kit. Every week, 3 hour long classes with both theoretical and practical sections. Available in Amsterdam and Berlin. More information on the website [www.modularmoon.com](http://www.modularmoon.com)

*TINRS workshop on EG (ADSR), part of Curriculum*

*Personal System prepared for each student*

## GROUP SESSION: € 654 / PER SESSION

Three hour long group session, with unlimited amount of participants. Possible in any point of the World. Interactive, educating and fun, opens up new horizons not only for newbies of modular, but also experts.

*Group Session in Prague, Czech Republic*

*Group Session at Modem Festival, Croatia*

## INDIVIDUAL WORKSHOP: € 65,40 / PER WORKSHOP

Two hour long individual training. Private one on one introduction to the modular world, tips and tricks, suggestions on personal workflow, system build up, signal routing and system design.

*Individual Workshop with student from Germany*

*Happy Students got their Modular Diploma*
